

Asphalt Institute

Mix Design Program SW-2

Introducing the Asphalt Institute's SW-2 Mix Design Program featuring Superpave Mix Design, Superpave Trial Blending, Marshall Mix Design, and Marshall Trial Blending.

This new SW-2 program is:

- Flexible for daily lab use
- User-friendly
- Easy to customize to fit your local needs

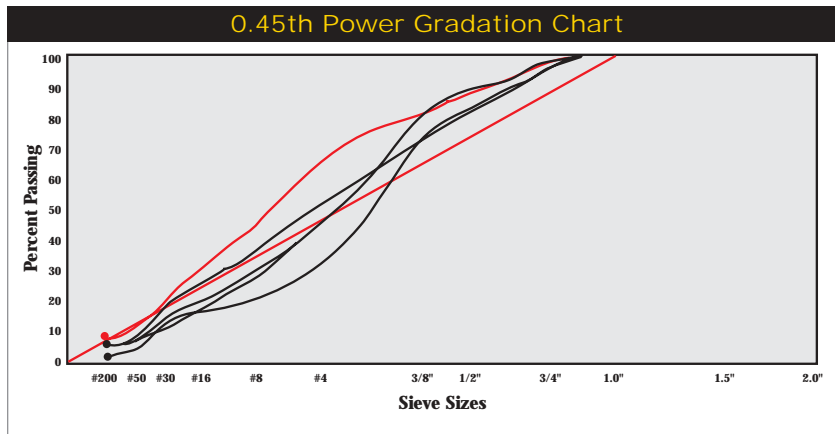

[\$200⁰⁰]

The SW-2 Mix Design Program is written in strict conformance to the Asphalt Institute SP-2 and MS-2 manuals and test procedures utilized in AI's research laboratory.

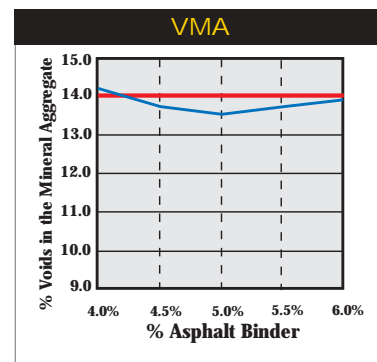

*System requirements:
Updated versions of Windows 98, Windows ME, Windows NT, Windows 2000 or Windows XP and Microsoft Excel. Microsoft Internet Explorer 5.0 or higher is required. Internet Explorer 6.0 is recommended.*

Many other programs on the market today perform the same basic functions as SW-2, but they are often less flexible and cumbersome. SW-2 allows the user to modify the program components to his or her individual needs. SW-2 is an Excel-based program that is password protected. With the password, users can modify individual worksheets to customize the program to meet specific requirements.
